

QUAD Platina Stream Quick Start Guide

Connect the power cord and switch on the mains. Press the Standby button. Ensure that the Platina Stream source is set to the 'Streaming' mode.

Please download and install the Platina Stream application from either the Apple App Store or Google Play Store by scanning the QR code.

Network Connection

Wired Network Setup:

If utilising a wired network, simply connect the Platina Stream directly to a router using an Ethernet cable.

Wi-Fi Setup:

Follow one of the two methods below to establish a Wi-Fi connection:

- **WPS Mode:** Briefly press the WPS button located on the rear panel of the Platina Stream, then press the WPS button on your router. Allow a few seconds for the connection to auto-configure.

A successful connection will be indicated by a red Wi-Fi icon on the Platina Stream display.

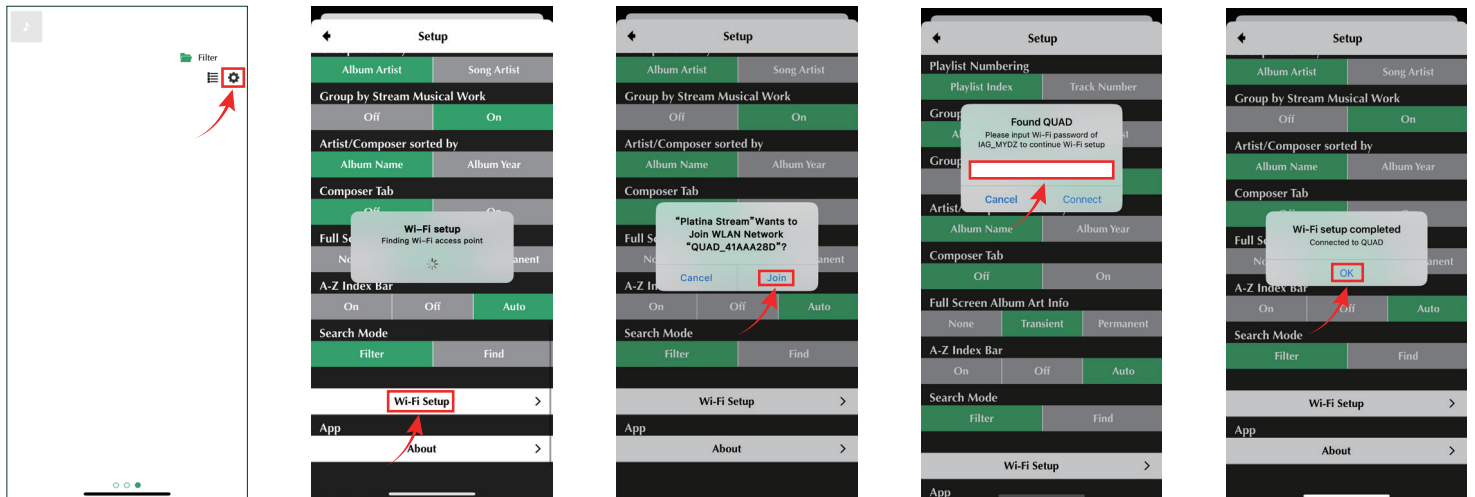

Should this not succeed, repeat the process but press the router's WPS button first. Those familiar with their router's administrator interface may also manually add a WPS client there.

- **AP Mode:** Press and hold the WPS button on the rear panel of the Platina Stream for six seconds. After a brief period, the display will show "Entering AP Mode". A few seconds later, it will change to "AP Mode".

In the Platina Stream app's settings, navigate to "Wi-Fi Setup" (the second option from the bottom). The app will locate your network and prompt you to enter your Wi-Fi password. After entering the password, press "Join".

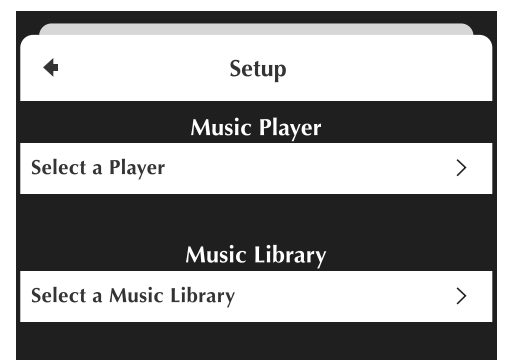

A successful connection will be indicated by a green Wi-Fi icon on the Platina Stream display.

Should the Wi-Fi icon turn green, yet the app continues to show "Connecting", check that your smart device has not connected to a different Wi-Fi network from the Platina Stream.

Once a network connection has been established, you may select the Platina Stream as your music player within the QUAD Platina Stream application - refer to the 'Select a Player' option.

If you have connected a USB storage device or a NAS drive to your router, you may select the corresponding music library under 'Select a Music Library'. The USB storage will be named according to your chosen designation for the Platina Stream, while a NAS drive's name can be read directly.

You can access Tidal, Qobuz, and TuneIn Radio streaming services directly in the Platina Stream app via the respective icon. You can also stream directly through Spotify Connect (in the Spotify app), Qobuz (in the Qobuz app), or Tidal Connect (in the Tidal app) for a native streaming experience.
